About the Company

A world-class Integrated **Manufacturer** in America, United Capital Group Energy L.L.C. Inc. (UCG) strives to create the best pipes, **pipe fittings, Transformers, Chemicals, Automation Systems, Oil and Gas Well head equipment, Pumps, Ware House Rack and Shelves manufacturer** in the market and works tirelessly to improve product quality, efficiency, and customer satisfaction. Our customers include large gas transmission companies, midstream companies, structural contractors, electricity generators/distributors and pipe distributors.

Pipe Fittings & Flanges OEM Service

UCG Energy specializes in manufacturing & exporting carbon steel pipe fittings and flanges.

The professional manufacturing capacity of UCG FITTINGS strongly guarantees the high quality, competitive price and short delivery time. UCG FITTINGS has have accumulated rich experience and good reputation in years of serving customers, which making us a reliable pipe fittings & flange supplier to clients from countries over the world. Clients of UCG FITTINGS are mainly from Russia, UAE, Saudi Arabia, Iraq, Iran, Kuwait, Oman, Thailand, Vietnam, South Africa, Nigeria, Chile, Brazil, Canada, Australia, Poland, Lithuania, etc. more than 40 countries.

Shut-Off Valve Test Units

United Capital Group Energy L.L.C., USA offers a large variety of machines and equipment for the repair and testing of any valve type, size and pressure class. Our mission is to supply guidance by sharing our experience. To pioneer, innovate and manufacture first class test and repair equipment for valves. We deliver safety.

The design and configuration of the UCG products are well proven and based on many years of experience in Shut-off valve, Safety valve and Control valve maintenance, testing and repair. The Ventil equipment is fully built in-house and only first class and durable materials are used. Most machines are available from stock at one of the UCG locations across the globe.

Shut-Off Valves Units

MODEL: VCB30

- ⊕ Vertical clamping and testing of all common valves.
- ⊕ Available up to 120" / DN 3,000 mm with clamping force up to 5,000 ton.
- ⊕ Up to 200 ton with rotating bridge, larger models with rail system for quick and safe (un)loading.

Model	Range*	Maximum clamping force	Distance between columns	Distance between sealing adapters	Low pressure Gas test system	High pressure Liquid test system
VCB5	½ - 6" DN15 - 150 mm	5 ton	14" 350 mm	0 - 20" 0 - 500 mm	0 - 7 bar / 100 PSI Other Gas test systems up to 1,000 bar / 14,500 PSI available on request.	0 - 400 bar / 5,800 PSI Other Liquid test systems up to 2,500 bar / 36,250 PSI available on request.
VCB30-S	½ - 10" DN15 - 250 mm	30 ton	18" 460 mm	0 - 30" 0 - 750 mm

Warehouse Racks

UCG has been developing warehouse racking technologies for many years, and we have a rich variety of racking equipment to meet your customized needs.

No matter you are a racking dealer or an end-user, you can all customize your racking exclusive designs.

We can help you come true the below idea:

- Make your exclusive logo at racking surface
- Your face design and use UCG Storage regular industrial racking section.
- Your full racking design with your section.
- Your other special racking exclusive design.

In order to help you save developing cost and time, we invented an exclusive new design of leading rivals – 3D selective pallet racking sample, we can submit you 1:1 3D sample before bulk production.

Industrial Grade Pump

UCG Energy is a company manufacturing & marketing pumps, process equipment and installations. The production facility is located in America.

The pumps manufactured by us include Progressive Cavity Pumps, Twin Screw Pumps, Triple Screw Pumps, Gear Pumps, Lobe Pumps, Vane Pumps, Shuttle Block Pumps as well as Thermic Fluid Pumps. With this complete range of pumps, Pumpsquare offers to the engineers, suppliers, OEM's and users a single source of supply for their pump requirements.

Industrial Pumps

Horizontal Foot Mounted Pump Coupled with Geared Motor

Vertical Flange Mounted Pump Directly Coupled with Motor

Pump with Built-in Relief Valve with facilitation of connection to tank for preventing overheating of pumping media

Pump with Line Mounted Relief Valve

Twin Screw Pump

Series Features:

Capacity Range: up to 550 m³/hr

Viscosity Range: up to 207600 cSt

Temperature Range: up to 80° C

Pressure Range: up to 16 Bar

As the double-start screws meshes, a continuous axially moving voids/pockets generate, which traps the liquid inside it, and hence transfers the fluid, where it required.

These pumps permits an even axial flow without pulsation and silent pumping operation even at a high speed. Axial loads on the rotor are often compensated by an adequate design of the bearing and all the radial forces are self-compensated.

Further, size of a rotor kept small in the design, which enables these pumps to run at a higher speed with direct coupling to the prime mover. Self-compensated radial forces eliminate need of bearing High pressure capacity up to 40 Bar Self-Priming and reversible cartridge design simplifies maintenance problem and saves lead time.

As shown in the above figure, the API version of pump can be provided on demand, which incorporates timing gears on back side. Further, helical timing gears are also provided when requested. Please note that our standard design contains spur timing gears on front side.
